

## Simpozij Akutna stanja u kardiologiji Emergencies in cardiovascular medicine

Radna skupina za akutni koronarni sindrom,  
Hrvatsko kardiološko društvo

Koronarna jedinica Kliničke bolnice *Sestre milosrdnice*,  
Zagreb

Poštovane kolegice i kolege,

Vaše sudjelovanje na ovome simpoziju posvećenom akutnim stanjima u kardiologiji čini nam veliku čast. Simpozij je predviđen za liječnike koji sudjeluju u liječenju hitnih kardijalnih bolesnika, kako u koronarnim jedinicama i kardiološkim odjelima, intenzivnim jedinicama i hitnim službama bolnica, tako i u njihovom prehospitalnom zbrinjavanju.

Koronarna jedinica Kliničke bolnice *Sestara milosrdnica* osnovana je 1970. godine i bila je prva koronarna jedinica u Hrvatskoj i u ovome dijelu Europe. Proteklo je gotovo osam godina od našeg prethodnog simpozija u sklopu obilježavanja 30. godišnjice njenoga osnutka. U međuvremenu se mnogo toga zbilo, zabilježen je vrtoglavi razvoj dijagnostičkih, terapijskih i intervencijskih postupaka u akutnim stanjima u kardiologiji i to nam dozvoljava tvrdnju da se radi o jednom od najprofulzivnijih područja u modernoj medicini. Upravo ova činjenica nameće potrebu trajnog praćenja tokova moderne medicine i želja nam je naše znanje i iskustvo podijeliti s vama.

Na simpoziju kao predavači sudjeluju mnogi eminentni stručnjaci iz naše zemlje i inozemstva s neprocjenjivim znanjima i iskustvima koja će podijeliti s nama. Iako smo

Working Group for Acute Coronary Syndrome,  
Croatian Cardiac Society

Coronary Care Unit, Clinical Hospital *Sestre milosrdnice*,  
Zagreb

Dear colleagues,

Your participation at this symposium dedicated to emergencies in cardiovascular medicine is a special honor for us. The symposium is intended for physicians who participate in the treatment or urgent cardiac patients, not only in coronary units and cardiac departments, intensive care units and hospital emergency units, but also in their pre-hospital care.

The Coronary Care Unit of the Clinical Hospital *Sestre milosrdnice* was founded in 1970 and was the first coronary unit in Croatia and in this part of Europe. It has been almost 8 years since we participated in our last symposium celebrating the 30<sup>th</sup> anniversary of its foundation. In the meanwhile, many things have happened, a rapid development of diagnostic, therapy and intervention-related procedures in cardiovascular emergencies has been recorded which allow us to make a statement that this is one of the most propulsive area in modern medicine. This is exactly the fact that makes it necessary to permanently monitor the modern trends in medicine and we wish to share our knowledge and experience with you.

The symposium will be attended by a whole series of lecturers who are renowned experts from our country and abroad possessing valuable knowledge and experience that they will share with us. Although we attempted to in-

nastojali obuhvatiti veliki broj akutnih stanja u kardiologiji, svjesni smo da će neka, radi kratkoće vremena, ostati za raspraviti u nekoj novoj prilici (primjerice plućna embolija, hipertenzivna kriza i dr.). Nadamo da ćete kao sudionici ovoga simpozija steći niz novih saznanja koja ćete moći koristiti u svome svakodnevnom radu.

S poštovanjem,

clude a large number of emergencies in cardiovascular medicine, we are aware of the fact that due to a lack of time, some of them are to be discussed on some other occasion (such as pulmonary embolism, hypertensive crisis, etc.). We hope that that you as symposium participants will be provided with a series of new information that you will be able to use in your daily work.

Respectfully yours,

*Prof. Vjeran Nikolić-Heitzler, M.D, Ph.D., F.E.S.C.*
