## Treći hrvatski ehokardiografski simpozij s međunarodnim sudjelovanjem

### Third Croatian Echocardiography Symposium With International Participation

Opatija, October 16<sup>th</sup> — 18<sup>th</sup> 2009, Hotel "Ambasador"

Poštovani kolegice i kolege,

Iznimna nam je čast pozvati vas na *Treći hrvatski ehokardiografski simpozij s međunarodnim sudjelovanjem* koji će se pod tradicionalnim motom **Kardiovaskularni ultrazvuk - put od vizualizacije do spoznaje u kliničkoj kardiologiji** održati u razdoblju od 16. do 18. listopada 2009. u Hotelu "Ambasador" u Opatiji. Iako je već dugo nezaobilazna rutinska kardiološka dijagnostička disciplina, ehokardiografija nas ne prestaje izazivati kontinuiranim razvojem spoznaja, metoda i daljnjim porastom značaja u rutinskoj praksi.

Tako program predstojećeg Simpozija uključuje plenarne sekcije unutar nekoliko najznačajnijih suvremenih ehokardiografskih područja: dijastologije, poremećaja miokarda i perikarda, desne klijetke, valvularnih bolesti, transezofagusne ehokardiografije, kao i pregled novih ehokardiografskih, te srodnih vizualizacijskih tehnologija.

Veselimo se Vašem dolasku u Opatiju.

Za Organizacijski odbor / For the Organizing Committee:

**Alen Ružić**

E-mail: [alen.ruzic1@ri.t-com.hr](mailto:alen.ruzic1@ri.t-com.hr)

Dear Colleagues,

It is a great pleasure to invite you to the *Third Croatian Symposium of Echocardiography with International Participation*, traditionally entitled **Cardiovascular Ultrasound: from Imaging to Knowledge in the Practice of Clinical Cardiology**, which will be held on 16-18 October 2009 at the Hotel "Ambasador" in Opatija, Croatia.

Echocardiography is one of the most rapidly developing imaging techniques, with ever increasing importance in the treatment of cardiac patients.

The program of the congress will include plenary sessions with the following main topics: diastology, myocardial and pericardial disease, echocardiography challenges of the right ventricle, valvular diseases, transesophageal echocardiography, old and new imaging technologies.

We are looking forward to seeing you in Opatija.
