

Priznanje Kardiološkom odsjeku Opće bolnice Koprivnica

Recognition to the Cardiac Division of the Koprivnica General Hospital

Dragica Kramarić

*Opća bolnica Koprivnica, Koprivnica, Hrvatska
Koprivnica General Hospital, Koprivnica, Croatia*

Povodom Dana grada Koprivnice 4. studenoga 2009. godine Kardiološki odsjek Opće bolnice "Dr. T. Bardek" nagrađen je Plaketom Grada Koprivnica za "Sveukupni doprinos i iznimne rezultate u liječenju srčanih bolesnika i smanjenju ukupne smrtnosti od infarkta."

U vrijeme kad se kroz medije provlače brojne kritike na račun medicinskog osoblja sretni smo da su sugrađani prepoznali naš dugogodišnji trud i nastojanje da svojim bolesnicima pružimo, u našim mogućnostima, maksimalnu medicinsku skrb. Posljednje četiri godine zaista je učinjen velik iskorak u kvaliteti zbrinjavanja bolesnika s akutnim infarktom miokarda, prvenstveno uključivanjem u Mrežu urgentne perkutane koronarne intervencije i iznimno dobrom suradnji s kardiološkom službom Kliničke bolnice "Dubrava" Zagreb. Ne samo da je značajno smanjen mortalitet od infarkta, nego je interventno zbrinut i velik broj bolesnika s nestabilnom i stabilnom anginom pektorisa. Izvrsnu suradnju razvili smo i sa svim drugim zagrebačkim klinikama te s Specijalnom bolnicom za kardijalnu kirurgiju i kardiologiju "Magdalena". Bez njihove nesebične pomoći naš uspjeh ne bi bio moguć i stoga smo im vrlo zahvalni na tako dobroj suradnji i, svakako, to nije priznanje samo nama nego i njima. Dakako, naše kolege s ostalih odsjeka Internog odjela pružili su nam neprocjenjivu pomoć jer su velik dio posla odradili upravo oni u svojim dežurstvima, pa niti bez njih ne bismo postigli takve rezultate. Nezaobilazna je zasluga naših medicinskih sestara koje su sastavni dio tima i vrlo često su žrtvovalle svoje slobodno vrijeme kako bi pomogle bolesnicima.

Ova je Plaketa dokaz da je unatoč krizi morala naš trud prepoznat i daje nam poticaj za još kvalitetniji rad.

Commemorating the Day of the Town of Koprivnica on 4th November 2009, the Cardiac Division of the General Hospital "Dr. T. Bardek" received the Plaque of the Town of Koprivnica for "All the contribution and outstanding results of treatment of cardiac patients and decrease in total mortality from myocardial infarction."

During the time when the medical staff has been highly criticized in the media, we are happy that our citizens have recognized our long-time efforts and endeavors to provide all of our patients with best medical care as much as we can. During the last four years, a great improvement has been made concerning the management of patients with acute myocardial infarction, mainly by including them in the Urgent percutaneous coronary intervention network and owing to very good cooperation with the Cardiac Department of the "Dubrava" Clinical Hospital in Zagreb. Not only has the mortality from myocardial infarction been greatly reduced, but a great number of patients with unstable and stable angina pectoris have been managed by applying emergency methods. We have also established excellent cooperation with some other Zagreb clinical hospitals and with the Special hospital for Cardiac Surgery and Cardiology "Magdalena". Our success would be impossible without their great help and we are therefore very grateful to them for such good cooperation and this is not only the recognition to us, but also to them. Our colleagues from the Department of Internal Medicine have also helped us very much since it is them who did a great part of job on their duties and we would not achieve such results without them. Our nurses who are an integral part of the team have greatly contributed to our success and they frequently sacrificed their free time to help our patients.

This Plaque is evidence that despite the crisis of moral, our efforts have been recognized and we are stimulated to work even better.
