Poliklinika za prevenciju kardiovaskularnih bolesti i rehabilitaciju, Zagreb u 2010. godini obilježava šezdesetu obljetnicu neprekidnog djelovanja. U okviru svoje djelatnosti "Srčana" provodi specijalističko-konzilijarnu zdravstvenu zaštitu, dijagnostiku i medicinsku rehabilitaciju kardiovaskularnih bolesnika, a korisnici su, uz osiguravatelje HZZO i drugih osiguravatelja, tvrtke za čije zaposlenike organiziramo sistematske preglede te građani koji izvan sustava zdravstvenog osiguranja ostvaruju preventivnu ili kurativnu zdravstvenu skrb u području kardiologije.

Povodom 60-te obljetnice tijekom godine organizirano je više aktivnosti, a središnja i završna je simpozij koji će se održati krajem mjeseca studenoga. Tada će biti predstavljena monografija i filmski zapis o Poliklinici, a uz prigodni program bit će i održana stručna predavanja. Simpozij će biti bodovan od Hrvatske liječničke komore.

The Institute for Prevention of Cardiovascular Diseases and Rehabilitation, Zagreb is celebrating in 2010 the 60th anniversary of its continuity work. Within its activity "Srčana" conducts consultative specialist healthcare, diagnostics and medical rehabilitation of cardiovascular patients and the beneficiaries are, besides the persons insured by Croatian Health Insurance Institute and other insurance companies, the companies for whose employees we organize systematic check-ups and the citizens who are entitled to preventive and curative healthcare in the field of cardiology and who are not included in the health insurance system.

On the occasion of the 60th anniversary we organize several activities, while the central and the final activity is the symposium that will be held by the end of November. At that time, monograph and film about the Institute will be shown thereby holding expert lectures accompanied by the occasional program. The participation in the symposium will be scored by the Croatian Medical Chamber.

Received: 13th Sept 2010
