

Svjetski dan srca 2010. godine u Karlovcu

2010 World Heart Day in Karlovac

Davor Horvat*

*Opća bolnica Karlovac, Karlovac, Hrvatska
Karlovac General Hospital, Karlovac, Croatia*

Dana 24. rujna 2010. godine u prostorijama Karlovačke županije obilježen je Svjetski dan srca. Organizatori su bili Karlovačka županija, Zavod za javno zdravstvo Karlovačke županije, Opća bolnica Karlovac, Medicinska škola Karlovac i Dom zdravlja Karlovac.

U 130 osoba izmjereni su arterijski tlak, glukoza u krvi, kolesterol i indeks tjelesne mase, a sudionici su dobili liječničke savjete i letke s ovogodišnjom tematikom za Dan srca. Pozvani su bili djelatnici županije i svih okolnih ustanova iz središta grada te svi zainteresirani prolaznici.

Akcija je ove godine u Karlovcu održana četvrti puta za redom, no valja naglasiti da su od ove godine po prvi puta bili uključeni i svi domovi zdravlja s područja cijele Karlovačke županije. Cijela je akcija protekla vrlo uspješno i bila popraćena u lokalnim tiskanim i elektroničkim medijima.

On 24th September we celebrated the World Heart Day in the premises of the County of Karlovac. It was organized by the County of Karlovac, Public Health Institute of the County of Karlovac, Karlovac General Hospital, Karlovac Secondary School of Medicine and Karlovac Public Health Center.

Some 130 persons underwent the procedure of measuring blood pressure, blood glucose, cholesterol and body mass index, while the participants received doctors' advices and brochures with this year theme for the World Heart Day. The County employees and all surrounding institution employees from the town as well as all interested parties were invited.

This action was held in Karlovac for the fourth time consequently, but we need to mention that this year all county health centers were for the first time involved in this action. The whole action was very successful and it was followed by local print and electronic media.
