

Pet godina rada Laboratorija za kateterizaciju srca i invazivnu kardiologiju Kliničkog bolničkog centra Osijek

Five-Year Work of the Laboratory for the Catheterization of Heart and Invasive Cardiology of the Clinical Hospital Centre in Osijek

Sandra Makarović*

*Klinički bolnički centar Osijek, Osijek, Hrvatska
Clinical Hospital Centre Osijek, Osijek, Croatia*

U subotu 6. studenoga 2010. godine na Medicinskom fakultetu u Osijeku održan je, povodom proslave pet godina rada Laboratorija za kateterizaciju srca i invazivnu kardiologiju, simpozij "Dosezi i tendencije u invazivnoj kardiologiji".

Tom svečanom prigodom uvodnu riječ i predavanje održao je Predstojnik Kliničkog odjela za bolesti srca i krvnih žila doc. dr. sc. Robert Steiner na temu "Invazivna kardiologija u Kliničkom bolničkom centru Osijek". Istaknuo je da je od otvaranja laboratorija 17. lipnja 2005. god. i prve koronarografije u Osijeku pa do 2010. učinjeno ukupno 3.465 koronarografija, postavljeno 1.495 stentova te 279 hitnih i 983 elektivnih PCI, čime je opravdana potreba za invazivnom kardiologijom ne samo u Osijeku i županiji, nego i cijeloj Slavoniji i Baranji. Čast i obveza je uključivanje Laboratorija u Hrvatsku mrežu za zbrinjavanje oboljelih od akutnog infarkta miokarda, što je potvrda dobrog rada i organizacije urgentnog zbrinjavanja kardioloških bolesnika.

Od početka rada do danas u našem kateterizacijskom laboratoriju radi petero liječnika, doc. dr. sc. Robert Steiner, dr. Damir Kozmar, dr. Vedrana Baraban, dr. Zorin Makarović, dr. Damir Kirner, inženjeri Ivica Weinberger i Domagoj Boban te medicinske sestre Marija Popić, Marija Medić, Vedran Nađ, Marija Matić, Dubravka Lončar i Dubravka Ramljak. Istaknuto je da laboratorij za kateterizaciju srca, uspješno pokriva široko područje koje obuhvaća pet županija (Osječko-baranjska, Vukovarsko-srijemska, Virovitičko-podravska, Brodsko-posavska i Požeško-slavonska), a zbrinut je i po koji bolesnik i iz drugih županija.

Čast nam je bila pozvati i poslušati invazivne kardiologe doc. dr. sc. Maju Strozzi koja je u svom izvrsnom predavanju prikazala dosege i tendencije u invazivnoj kardiologiji i prof. dr. sc. Robert Bernat koronarografiju transradijalnim pristupom. Potom su dr. Vedrana Baraban i dr. Zorin Makarović prikazali najzanimljivije slučajeve iz osobnog iskustva rada u ovih pet godina. Zajedno smo imali priliku čuti uvijek zanimljive i korisne teme iz područja invazivne kardiologije te razmotriti načine poboljšanja rada i održavanja stručnosti.

Ujedno su podijeljene zahvalnice od kolegama koji su prepoznali potrebu za otvaranjem kateterizacijskog laboratorija te nam pomogli u njegovom nastajanju i radu. Time se neizmerno puno učinilo za pacijente iz područje cijele

On Saturday, on 6th November 2010 the symposium "Results and Tendencies in Invasive Cardiology" was held at the Faculty of Medicine in Osijek on occasion of celebration of the five-year work of the Laboratory for the Catheterization of Heart and Invasive Cardiology.

On that ceremonial occasion, the word of introduction and the lecture was given by the Principal of the Clinical Department for the cardiovascular diseases Ass. Prof. Robert Steiner, PhD on the topic "Invasive Cardiology in the Clinical Hospital Centre Osijek". He mentioned that since opening of the laboratory on 17th June 2005 and the first Coronarography Department in Osijek till 2010 a total number of 3.465 coronarographies have been performed, 1.495 stents and 279 emergency and 983 elective PCIs have been implanted which justifies the need for invasive cardiology not only in Osijek and the County, but in whole Slavonija and Baranja. We are honored and obligated to include the Laboratory in the Croatian Network for the management of persons suffering from acute myocardial infarction which is a confirmation for the good work and organization of urgent management of cardiac patients.

From the start of the work to date, five physicians have been working in our catheterization laboratory, these are Ass. Prof. Robert Steiner, PhD, Dr. Damir Kozmar, Dr. Vedrana Baraban, Dr. Zorin Makarović, Dr. Damir Kirner, engineers Ivica Weinberger and Domagoj Boban and nurses Marija Popić, Marija Medić, Vedran Nađ, Marija Matić, Dubravka Lončar and Dubravka Ramljak. It has been pointed out that the laboratory for heart catheterization successfully covers a wide area that includes five counties (the County of Osijek and Baranja, the County of Vukovar and Srijem, the County of Virovitica and Podravina, the County of Brod and Posavina and the County of Požega and Slavonija) while some patients from other counties have been managed too.

We were honored to invite and listen to invasive cardiologists Ass. Prof. Maja Strozzi, PhD who showed us the results and tendencies in invasive cardiology in her excellent lecture and Prof. Robert Bernat, PhD who spoke about transradial approach in coronarography. Following that, Dr. Vedrana Baraban and Dr. Zorin Makarović showed some of the most interesting cases from their personal work experience during these five years. We all had an opportunity to listen to always interesting and useful topics in the area of invasive cardiology and consider the methods of improvement of our work and maintenance of expertise.

At the same time, Certificates of Gratitude were handed out to colleagues who recognized the need for ope-

Slavonije i Baranje, te okolnih gravitirajućih županija čime smo omogućili pacijentima zbrinjavanje ravno zapadno europskim centrima.

Zahvalnice su svečano dodijeljene doc. dr. sc. Maji Strozzi, koja je od početka prihvatila i educirala naše prve invazivne kardiologe u KBC Zagreb kao i sve ostale osječke invazivce te im zajedno s ostalim kolegama nesebično prenosila svoje znanje, prof. dr. sc. Draganu Kovačeviću predsjedniku upravnog vijeća KBC Osijek, doc. dr. sc. Željku Vranješiu ravnatelju KBC Osijek, prof. dr. sc. Aleksandru Včevu predstojniku Interne klinike KBC Osijek, prof. emeritusu Antunu Tucaku, prof. dr. sc. Krešimiru Glavini, mr. sc. Marijanu Jakiću tadašnjem ravnatelju osječke bolnice, koji se prisjetio liječenja srčanih infarkta iz vremena prije otvaranja laboratorija za kateterizaciju srca. Zahvalnice su dodijeljene i dr. Ranku Ugljenu predstojniku Odjela kardiokirurgije KBC Osijek, koji je prihativši rad u KBC Osijek omogućio otvaranje kardijalne kirurgije te prof. dr. sc. Katji Čatipović Veselici, tadašnjoj predstojnici kardiološkog odjela koja je ustrajala uz udругu Kardiovaskularnih bolesnika u ideji i realizaciji otvaranja kateterizacijskog laboratorija.

Svečenosti su prisustvovali i brojni gosti te kardiolozi iz Zagreba, Splita, Rijeke, Krapinskih Toplica te Slavenskog Broda.

Nakon završenog službenog svečanog dijela predavanja, druženje smo nastavili u Baranji parku prirode Kopačkom ritu i atraktivnom restoranu Kormoran, gdje je uz dijetalni menu i tamburaše atmosfera bila vesela, a razgovor smo nastavili u neformalnijem obliku.

Simpozij je bio bodovan od strane liječničke komore, a održan uz pomoć sponzora farmaceutskih tvrtki Sonimed, te Belupa i GE.

ning of the Catheterization laboratory and helped us in its creation and work. In this way, we have done a lot for the patients from the area of whole Slavonija and Baranja and surrounding gravitating counties, whereas we provided our patients with the management equaling the management in the west European centers.

The Certificates of Gratitude were solemnly awarded to Ass.Prof. Maja Strozzi, PhD who from the beginning accepted and educated our first invasive cardiologist in the Zagreb Clinical Hospital Centre and all other Osijek invasive cardiologists and unselfishly transferred her knowledge to her colleagues, Prof. Dragan Kovačević Phd, President of the Management Council of the Osijek Clinical Hospital Centre, Ass.Prof. Željko Vranješ PhD, the Principal of the Osijek Clinical Hospital Centre, Prof. Aleksandar Včev, PhD the Principal of the Internal Medicine Clinic of the Osijek Clinical Hospital Centre, Prof. Emeritus Antun Tucak, Prof. Krešimir Glavina PhD, M.Sc. Marijan Jakić former Principal of the Osijek Hospital, who remembered the treatment of myocardial infarction from the period prior to opening of the Laboratory for Heart Catheterization. The Certificates of Gratitude were also awarded to Dr. Ranko Ugljen, the Principal of the Cardiosurgery Department of the Osijek Clinical Hospital Centre who after having accepted the job in the Osijek Clinical Hospital Centre enabled opening the Cardiac Surgery and Prof. Katja Čatipović Veselica PhD, the former Principal of the Cardiology Department who insisted on the idea and realization of opening of the Catheterization Laboratory together with the Association of the cardiovascular patients.

The ceremonies were attended by a number of guests and cardiologists from Zagreb, Split, Rijeka, Krapinske Toplice and Slavenski Brod.

After the official ceremonial part of the lecture finished, we continued to socialize in Baranja, the Nature Park Kopački rit and attractive restaurant Kormoran in cheerful atmosphere with diet menu and tambura players and we conducted talks in a more informal way.

The Symposium was credited by the Croatian Medical Chamber and it was held with the aid of sponsors, the pharmaceutical company Sonimed, Belupo and GE.
