

Poslijediplomski tečaj “Srčane aritmije — racionalni pristup”

Postgraduate course “Car- diac Arrhythmias — Rational Approach”

Mislav Puljević*

*Klinički bolnički centar Zagreb, Zagreb, Hrvatska
Clinical Hospital Centre Zagreb, Zagreb, Croatia*

U Klinici za bolesti srca i krvnih žila Kliničkog bolničkog centra Zagreb u organizaciji Medicinskog fakulteta od 22. do 24. travnja 2010. održan je prvi poslijediplomski tečaj trajnog medicinskog usavršavanja I. kategorije: “Srčane aritmije — racionalni pristup”. Predavači su bili doc. dr. sc. Davor Puljević i dr. Bruno Buljević. Iako je, obzirom na veličinu predavaonice, broj sudionika bio ograničen na 40, tečaju je prisustvovalo 55 kolega što potvrđuje interes i zanimljivost tema. Sudionici su stigli iz svih dijelova Hrvatske, kao i iz Bosne i Hercegovine.

Trodnevni intenzivni tečaj obuhvatio je sve aspekte ritmologije od općih i bazičnih spoznaja do dijagnostike i terapije specifičnih aritmija. Posljednji dan proveden je pismeni ispit koji su svi sudionici uspješno položili. Ankete o zadovoljstvu tečajem provedene na završetku tečaja bile su iznimno povoljne.

Kako je broj prijavljenih sudionika bio veći od predviđenog, dio kandidata nije mogao prisustvovati tečaju te je unatoč zamisli da se tečaj održava jednom godišnje, odlučeno da se tečaj još jednom ponovi krajem rujna 2010. godine.

Received: 10th May 2010

At the Clinic for Cardiovascular Diseases of the Clinical Hospital Centre Zagreb organized by the Faculty of Medicine, the 1st category Postgraduate course in continuous medical training was held from 22nd to 24th April 2010: “Cardiac Arrhythmias — Rational Approach”. The lecturers were Ass. Prof. Davor Puljević, PhD and Dr. Bruno Buljević. Although the number of participants was limited to 40 colleagues with regard to the size of the lecture room, the course was attended by 55 colleagues showing a great interest and interesting topics. The participants came from all parts of Croatia and Bosnia and Herzegovina, too.

A three-day intensive course comprised all aspects of rhythmology from general and basic information to diagnostic and therapy specific arrhythmias. On the last day, a written examination was conducted that all participants successfully passed. The course satisfaction questionnaires conducted at the end of the course were very positive.

Since the number of registered participants was greater than the forecasted one, a part of candidates could not participate in the course and despite the idea that the course should be held once a year, it was decided to organize the course once again at the end of September 2010.

Poslijediplomski tečaj trajnog medicinskog usavršavanja I. kategorije:

“Srčane aritmije — racionalni pristup”, 23. do 25. rujna 2010.

Organizator: Medicinski fakultet u Zagrebu

Voditelj tečaja: doc. dr. sc Davor Puljević

Tajnik: dr. Mislav Puljević

Mjesto: Klinika za bolesti srca i krvnih žila, KBC Zagreb
