University Hospital Center "Sestre milosrdnice", Zagreb, Croatia*

Dana 16. travnja 2011. godine na Internoj klinici Kliničkog bolničkog centra "Sestre milosrdnice" u Zagrebu održan je tečaj I. kategorije Medicinskog fakulteta Sveučilišta u Zagrebu pod naslovom "Inicijalno zbrinjavanje bolesnika s akutnim koronarnim sindromom ili od ranog prepoznavanja do uspješnog reanimacijskog postupka bolesnika s akutnim koronarnim sindromom". Tečaj je dio kontinuirane edukacije koju provodi Radna skupina za akutni koronarni sindrom Hrvatskog kardiološkog društva s ciljem poboljšanja rezultata liječenja toga stanja. Sudionici tečaja bili su liječnici hitnih medicinskih pomoći Sisačko-moslavačke županije.

Predavači prof. dr. sc. Vjeran Nikolić Heitzler, dr. sc. Zdravko Babić i doc. dr. sc. Vesna Degoricija su u jutarnjem dijelu tečaja upoznali sudionike s novostima u ranoj i brznoj dijagnostici i liječenju bolesnika s akutnim koronarnim sindromom sa i bez elevacije ST-segmenta te njegovim komplikacijama. U poslijepodnevnom dijelu tečaja sudionici su radom u radionicama imali priliku u praktičnom radu ponoviti postupke kardiopulmonalne reanimacije, elektrokardiografsku dijagnostiku različitih oblika akutnog koronarnog sindroma aritmija i smetnji provođenja, kao i komplikacija toga stanja. Prikazano im je i niz slučajeva liječenja bolesnika s akutnim koronarnim sindromom iz svakodnevnog rada Koronarne jedinice KBC "Sestre milosrdnice".

Sudionici su odlično ocijenili tečaj i predavače koji sličan tečaj pripremaju ujesen. Na kraju, ali ne i najmanje važno, tečaj ne bi bilo moguće organizirati bez pomoći partnera tečaja tvrtke Krka.

On 16<sup>th</sup> April 2011 the 1<sup>st</sup> category course organized by the University of Zagreb School of Medicine of the entitled "Initial Management of Patients with Acute Coronary Syndrome or from early recognition to successful reanimation of the procedure with patients with acute coronary syndrome" was held at the Internal Clinic of the University Hospital Center "Sestre Milosrdnice" in Zagreb. The course is a part of the continuous education programme and training conducted by the Working Group for Acute Coronary Syndrome of the Croatian Cardiac Society aimed at improvement of the results of treatment of such condition. The participants were medical emergency physicians of the County of Sisak and Moslavina.

In the morning part of the course, the lecturers Prof. Vjeran Nikolić Heitzler, PhD, Zdravko Babić PhD and Ass. Prof. Vesna Degoricija, PhD made the participants familiar with novelties in early and fast diagnostics and treatment of patients with acute coronary syndrome with or without ST-segment elevation and its complications. In the afternoon part of the course, working in the workshops the participants had an opportunity to revise the procedures of cardiopulmonary reanimation, electrocardiographic diagnostics of different forms of acute coronary syndrome of arrhythmias, disorders of conducting thereof and complications of such conditions. They were presented a series of cases of treatment of patients with acute coronary syndrome from daily work of the Coronary Unit of the Clinical Hospital Center "Sestre milosrdnice".

The course and the lecturers who are preparing a similar course in autumn were appraised as excellent by the participants. Last but not least important is the fact that it would be impossible to organize the course without help of the course partner, the Krka company.
